JCC Room Instructions

All computers in this room have the same software and operating system settings. Please do not add any software or modify any of the settings of these systems.

- The basic user login to Windows XP is jccuser with no password.
- Internet connectivity is provided by a wireless interface. You must verify your identity by using your University username and password to activate the network access. The login window will automatically appear after a Windows login or you may launch the Internet Explorer browser which will display the login dialog window. **Click on Yes** to proceed through the certificate check before seeing the login web page.

The login window is a secure web page so that your username and password information are securely sent to be authenticated by the server.
At the end of your session, you should logout through the logout window on the desktop. **Click inside the box on the logout section.**

- Some of the software can be used without the need for network authentication. This includes the Microsoft Office Suite (Word, Excel, etc.), Gaussian, Spartan, PCModel, Mathcad, ChemDraw, WinChiron, and the General Chemistry instructional software.
- Network access must be established to use the HP 5MP printer in this room, or to access the network licenses for the Hyperchem and Moe software packages.

**Room Use Etiquette**

- Please turn off the cell phone. The RF wireless can be temporarily disrupted by use within the vicinity of this room.
- Please do not eat or drink while in this room.
- Please take all newspapers, flyers, handouts with you or discard them in the available trash bins.
- If there are others awaiting access to a computer, please limit your computer use to the completion of necessary assignments or exercises and check the personal e-mail at a later time.
- If you find that any of the stations is not working properly, please record the number of the computer and the observed problem in the logbook located near the printer in the back of the room. You may also e-mail the problem to helpdesk@chemlan.chem.pitt.edu.

**Requests for Software Additions**

Faculty may request new software or the update of existing software at any time, but the software media must be in hand by four weeks prior to the start of the Fall and the Spring Terms.
